*Current waiting period is 4-8 weeks once receiving your inserts, design and payment*

Keep a little bit of your loved one close to your heart. Supply any inserts – examples include ashes, a lock of hair, photographs, pressed/dried flowers, a children's drawing, fingerprint/footprint etc. and I will preserve it into a truly unique piece. Since every pendant is cast by hand; each is a distinctive work of art fashioned individually; and may vary slightly from the pictures. Please have a look at the Facebook page for examples of various commissioned pieces. [www.facebook.com/keepsakejewellery](https://www.facebook.com/keepsakejewellery)

Please note: As most of the inserts I use are organic in nature, there might be slight imperfections or unevenness. Ashes have a broad range of colours from almost white to black. Breastmilk also has a broad range of hues and so your piece might have a slight yellow, blue or even pink tone This makes each piece more unique. Resin does slightly yellow over time. You can slow this from happening by not bathing/swimming with your pieces or exposing them to extended periods of sunlight. **Attachments and metals are sterling silver unless otherwise stated.**

**Vouchers** for brides, weddings, new mothers, friends etc. are available. Please contact me and I will email you a voucher.

Design time – included in the price of your piece is 30 minutes design time. This includes approximately 3-4 emails which is enough to come up with something unique together and settle on a design. Should the design time or emails exceed this 30 minutes, I reserve the right to charge a pro-rata hourly rate of R400. I will advise you before it gets to this though. Expedited orders will be charged at an additional R250 per piece.

All pendants exclude a sterling silver chain unless ordered. Pendants come on a non-sterling chain of approximately 55cm in length.

### How to send your inserts:

**Ashes** – Include 3-5ml per piece that you've ordered. **Breastmilk** – Include 10-15ml per piece, fresh or frozen. Place in 2 Ziplock bags with the air removed. Place inside small box, container, box or Tupperware. Label as beads. "Won't my breastmilk go bad in the post?" Your breastmilk won't be good enough to feed a baby but it will be perfectly fine to use for your jewellery. **Hair** – Include what you can. Please note that very blonde or white hair goes translucent in the resin. **Flowers** – Include pressed or dried flowers (not fresh please). Secure inside a container so they are not crushed. **Placenta/umbilical cord** – Must be dried/dehydrated beforehand. Other inserts such as horse hair, teeth, snakeskin etc. – include what you can. You can also email through photos, fingerprints, drawings etc.

**I do not send back any remaining inserts, so please only include the requested amounts.**

4. I will advise you once I have **received your parcel** and **sent your finished pieces back to you**. I collect parcels at Postnet **once a week** generally on a Tuesday. PLEASE NOTE: Please allow at least 4-8 weeks for your keepsakes to be sent to you after I receive your parcel and payment due to the fact that each one is a several week process to make and the demand for these items is high. (The delivery date might change depending on my suppliers, I will let you know at least 2 weeks before your order is due to arrive).

**Frequently Asked Questions & Terms and Conditions**

**How to I care for my resin piece?** Resin jewellery is sturdy and requires very little care. However, I do have a few tips for best results. Remove your jewellery when applying creams, perfume, hairspray or other beauty products, showering or swimming, washing hands (if wearing a ring) and/or cleaning with harsh chemicals/sanitizers. Do not allow your jewellery to become extremely cold or hot. For example, don't leave it in a car on a hot day. If it does become extremely hot, it will become malleable - just allow to cool to room temperature before handling excessively. Do not store in direct sun. Resin can be cleaned with a mild soap and water. The best way to restore resin's shine is to use a plastic polish. If something comes unstuck, please DO NOT use regular superglue to stick it back – you will damage your piece. Please contact me. Please do not let your babies or children yank or suck on the jewellery. It is delicate. I use a UV-stable, eco-friendly, high grade jewelers resin - though it might slightly yellow over time, this will not affect the preserved milk or inserts set inside.
